## PROFESSIONAL SUMMARY

---

CompTIA A+ and Security+ certified and disciplined U.S. Army Veteran with 6 years of experience as a Military Police Soldier specializing in security operations, risk assessment, and incident response. Hands-on experience building computers and working in PC labs with strong troubleshooting and hardware configuration skills. Proven ability to safeguard assets, enforce security protocols, and operate effectively under pressure. Currently pursuing advanced CompTIA certifications with a focused career goal in IT support and cybersecurity.

## TECHNICAL SKILLS

---

Windows OS • Basic Linux • PC Hardware & Assembly • Troubleshooting & Diagnostics • TCP/IP • DHCP • Routers & Switches • Network Security Fundamentals • Access Control • Antivirus & Endpoint Protection • Incident Response • Vulnerability Awareness • System Monitoring • Hardware/Software Installation • Backup Monitoring

## PROFESSIONAL EXPERIENCE

---

### Military Police Soldier

Department of Defense, U.S. Army | March 2020 – May 2026

- Conducted law enforcement and physical security operations protecting personnel, facilities, and sensitive assets.
- Led and supervised teams to ensure operational readiness and strict compliance with safety and security standards.
- Implemented and monitored access control measures and handled classified information in accordance with security policies.
- Collaborated with intelligence and security personnel to assess risks and respond to security incidents.
- Trained and mentored junior soldiers in threat identification, rapid response procedures, and operational discipline.
- Applied analytical thinking and problem-solving skills in high-pressure environments.
